

The Outrigger

Holiday Edition 2025

CCS Constructors, Inc.

Celebrating 58 Years 1967 – 2025

What was true back in 1967 is still true today in 2025.

Throughout the years, each new CCS project has reflected the growing complexity of the construction industry. How well CCS has kept pace with the demands of its clients is evidence by both the caliber of its projects and the increasingly sophisticated techniques, equipment and employees it employs. With cranes from 14 ton to 300 ton capacity, backhoes, loaders, dozers, dump trucks, vibratory and diesel pile hammers and lowbed trailers to 55 ton capacity, CCS stands ready to provide the best service available.

The CCS 'CAN DO' Attitude Stands the Test of Times.

****In the Works****

- *Stowe Bridges BR#48 & BR#51– CCS** work continues w/ VTrans & the Town of Stowe on Nebraska Valley Rd for the full replacement of the two bridges overlooking Miller Brook. Traffic will be maintained on a one-lane alternating temporary bridge with a signal. The target completion for both structures is Fall of 2025.
- *Rockingham, VT Bridge BR#38 – CCS** continues to work on the full bridge replacement on US-5 in Rockingham crossing the Green Mountain Railroad. This construction required a road closure with a detour for work to progress. CCS is making strides to complete this project by Fall 2025.
- *Wolcott, VT –** Bridge #6 on School St over the Lamoille River. The original bridge was built in 1928. Replacement of the existing Parker Pony Truss & bridge will continue into 2026.
- *Town of Strafford, VT –** The bridge replacement on Freeman Road is almost complete
- *Town of Vershire, VT – CCS** has completed the replacement of the Mero Road Bridge.

****On The Smaller Side - But Just As Important****

- *Crane Rentals – CCS** has had a busy summer working with a variety of customers on smaller crane jobs. Our crews have worked to set in place many items like; precast culverts, trusses, granite blocks, granite stairways & walls, water towers, digesters, precast concrete abutments, bridge beams, unload heavy equipment as well as a multitude of other odd jobs.

****Jobs On the Horizon ****

- *Hardwick Pedestrian Wall & Bridge – CCS** is teaming up with the Town of Hardwick to rebuild the retaining wall & pedestrian bridge that crosses over the Lamoille River. Project to start in Spring 2026.

NEWS WORTHY NEWS

CCS Constructors, Inc. gives a shout out to the work crews @ all of our job sites. Your Excellent work and drive to get the job done are what help make us all successful!
